

# Water shortages in the Middle East are among the most severe in the world.

The Water Resources Action Project (WRAP), a volunteer nonprofit, actively sponsors, designs, and implements the installation of rainwater harvesting systems at schools in the Middle East, complemented by a strong educational component.

By doing so, WRAP has been able to supply a significant portion of each school's water needs. WRAP works closely with local partners in Israel, Palestine, and Jordan.

## ADDRESSING THE MIDDLE EAST WATER CRISIS ONE DROP AT A TIME

October 7, 2014 3pm-4pm

Brendan McGinnis
